Our services

we support you at every stage of your projects

Consulting

We help you in the formulation of your needs, the understanding of your issues and the specific requirements related to your core business, while respecting ITIL best practices. We guide you in the choice to find the right ITSM solution and by implementing it.

Integration

Our methodology is based on an « Enablement » method : this will lead to a rapid, flexible and traceable implementation identifying the role of project management and IT teams by your teams and ours.

Training

Ahead of the project, the goals of training and skills transfer are to make you autonomous as quickly as possible, so that you can get the best out of your solution.

Support

Support is not outsourced, for any call, you will have access to trained personnel, you will have a privileged & personalised access to our online support space.
